

**Milestone Reached:**

The MRF, 220 S. Prairie Avenue in Waukesha, **reached the quarter million ton mark** at the end of March 2004! The plant has processed over 250,000 tons of recyclable materials since opening in 1991. The privately operated facility processes residential recyclables collected from 25 municipalities and has averaged 1800 – 2000 tons per month over the past two years.

“Continued participation by residents has made this milestone possible,” said Karen Fiedler, Solid Waste Supervisor for the County. “We put a lot of effort into education through tours of the facility, open houses, school and community presentations, and our website – and that has paid off as well.”
